Acoustics » Acoustic Ceiling Features

Taiko is a 610mm (24-inch) acoustic pendant that brings clarity and control to mid-scale interiors, delivering sound absorption in a balanced drum form.

✓ Acoustic

✓ Bleach Cleanable

✓ Easy Clean

✓ Easy Install

Description

Rather than reading as an applied retrofit, **Taiko** becomes part of the ceiling's architectural language. The Zintra PET drum body utilises Helmholtz resonator principles to target key speech frequencies, absorbing ambient build-up and reducing reflections to improve focus, clarity and overall spatial comfort. The result is a space that feels more resolved and easier to inhabit.

Taiko gives designers flexibility to map acoustic performance across a ceiling plane without adding visual clutter. Whether clustered alongside lit pendants withing a mixed installation or repeated in formation above collaboration zones, it maintains a consistent visual identity across a project.

Available in Zintra's full color palette, Taiko brings together technical acoustic function and intentional design in one considered, unlit form.

System includes:

Pendant, Zintra Disc, ASKs 1.5m (5') & Cover Plate
