3D PANEL BATTEN 2

Acoustic Panels

Zintra 3D Panels Batten 2 offer both an intriguing design element and functional acoustic enhancement. Add depth and design to flat surfaces which absorb sound and cancel out soundwaves.

✓ **Acoustic**

✓ **Bleach Cleanable**

✓ **Easy Install**

✓ **Easy Clean**

Description

Seamlessly joined, our 3D Wall Panels offer both an intriguing design element and functional acoustic enhancement for straight or curved walls. These narrow panels boast a small pattern repeat, facilitating easy adjustment for wall-to-wall fitting without the need for custom drawings.

Our **Batten** design is inspired by the timeless appeal of the board and batten pattern. Designed to bring a touch of architectural elegance and visual interest to your space. Featuring alternating wide boards and vertical battens, this captivating pattern creates a dynamic and textured surface. Its classic yet versatile design effortlessly adds a sense of depth and character to any project.

Also Available in Batten 4, Batten 6 and Peaks design

Our **Peaks** design resembles the peaks of mountains. This panel features a series of angular protrusions arranged in a symmetrical pattern, creating a dynamic and textured surface. Its narrow profile and intricate design make it suitable for a variety of applications, from modern offices and conference rooms to contemporary residential settings.

Not only does the Peak Panel contribute to the aesthetics of a space, but it also serves a functional purpose by enhancing sound absorption and cancelling out soundwaves. Its sculptural form adds depth and dimension to flat surfaces, transforming them into visually captivating focal points.

Not suitable as a free standing product.

How to Specify

1. Select Design
2. Select Zintra Colour

Composition

Zintra Acoustic Panel - 100% Solution Dyed (Colour Through) Polyester
12mm (1/2") -Density 2.4 kg /m² 0.5 lb/ft²

Sustainability

Zintra is made from 100% recyclable materials.

- 60% post-consumer recycled content from PET bottles.
- 35% pre-consumer recycled content from PET chips
- 5% polylactic acid (PLA)
